PROFILE

Full-stack developer who builds web and mobile products end to end, from the business problem to the shipped app, since 2022. I work in TypeScript, React, Next.js, Astro, React Native (Expo), Node.js and Supabase/Postgres. I use AI agents (Claude Code) as leverage and keep the decisions and the verification: tests, accessibility and performance checks on every change.

SKILLS

Frontend: TypeScript · React · Next.js · Astro · Tailwind CSS
Mobile: React Native · Expo · RevenueCat
Backend and data: Node.js · Supabase · PostgreSQL (RLS) · TanStack Query
3D and motion: three.js · React Three Fiber · GLSL · GSAP
AI and quality: Claude Code · MCP · Playwright · Vitest · Lighthouse
i18n: Lingui · lingui-translate-ai

EDUCATION

In progress

Programmer technician

ZSE Starogard Gdański, technical secondary school

- Also taking the IT technician vocational qualification course (KKZ) at the same school.

EXPERIENCE

June 2026 – now

Intern, Cetuspro

Software house, remote

- Real commercial projects for a software house, worked on remotely.
- Built PstrykWeb for the software house Cetuspro: bespoke websites for local businesses, ordered through one online form.
- Built the public konfigurator, the online order form (Next.js, TypeScript, Vercel).

2026 · 6 weeks

Intern, Neoteric

Software house, Poland

- Built Clockful, a role-based time tracker, with AI agents only, from a 15-requirement spec in about 9 days (an estimate from the repo dates).
- 118 automated tests (49 Vitest, 69 Playwright); Postgres row-level security on all 5 tables, with an audit trigger.

2026

Founder and developer, Linkoglot

Own product

- Designed, built and shipped an AI language-learning app to the App Store and Google Play, solo: snap a photo to get flashcards, quizzes and voice practice.
- Free trial, then monthly or yearly plans through RevenueCat; 30 languages with Lingui (Expo, React Native, Supabase).

App Store Google Play

1 month

Intern

KS Beniaminek 03, sports club

- Social projects at a sports club: work with people, communication and teamwork.

Since 2022

Freelance and own projects

- Websites and 3D landing pages for clients (React, React Three Fiber, GSAP).
- lingui-translate-ai: an npm CLI that translates Lingui catalogs with an LLM, grown out of Linkoglot.

SELECTED PROJECTS

2026

This site

- Astro, React, Lingui (en/pl/es); Lighthouse mobile 99 on the home page and 100 on the other pages, about 8 KB of JavaScript; built with a Claude Code setup of a project wiki, hooks and skills.

2025

3D space portfolio

- A scroll-driven WebGL journey from Earth to Neptune in 12 camera stops; 13 hand-written GLSL shaders (three.js, React Three Fiber, GSAP).
