MATEUSZ MUSZARSKI

Full-stack developer (React, Node.js, TypeScript)

Open to full-time and contract roles · remote or hybrid

PROFILE

Full-stack developer who builds web and mobile products end to end, from the business problem to the shipped app, since 2022. I work in TypeScript, React, Next.js, Astro, React Native (Expo), Node.js and Supabase/Postgres. I use AI agents (Claude Code) as leverage and keep the decisions and the verification: tests, accessibility and performance checks on every change.

EXPERIENCE

Developer, PstrykWeb — **Cetuspro** **2026**

Built PstrykWeb solo for the software house Cetuspro: bespoke websites for local businesses, ordered through one online form.
Built the public konfigurator, the online order form (Next.js, TypeScript, Vercel).

Intern, Neoteric — **Software house, Poland** **August 2026**

Built Clockful, a role-based time tracker, with AI agents only, from a 15-requirement spec in about 9 days (an estimate from the repo dates).
118 automated tests (49 Vitest, 69 Playwright); Postgres row-level security on all 5 tables, with an audit trigger.

Founder and developer, Linkoglot — **Own product** **2026**

Designed, built and shipped an AI language-learning app to the App Store and Google Play, solo: snap a photo to get flashcards, quizzes and voice practice.
Free trial, then monthly or yearly plans through RevenueCat; 30 languages with Lingui (Expo, React Native, Supabase).

App Store: https://apps.apple.com/app/id6768303316
Google Play: https://play.google.com/store/apps/details?id=com.linkoglot.app

Freelance and own projects — **Since 2022**

Websites and 3D landing pages for clients (React, React Three Fiber, GSAP).
lingui-translate-ai: an npm CLI that translates Lingui catalogs with an LLM, grown out of Linkoglot.

SELECTED PROJECTS

This site — **2026**

Astro, React, Lingui (en/pl/es); Lighthouse mobile 99 on the home page and 100 on the other pages, about 8 KB of JavaScript; built with a Claude Code setup of a project wiki, hooks and skills.

3D space portfolio — **2025**

A scroll-driven WebGL journey from Earth to Neptune in 12 camera stops; 13 hand-written GLSL shaders (three.js, React Three Fiber, GSAP).

QUALIFICATIONS AND TRAINING

INF.02 · INF.03 · INF.04 — Qualification — Technikum

Polish state vocational qualifications (CKE / OKE)
Computer systems and networks; websites, web applications and databases; designing, programming and testing applications.

Three.js Journey — Course — 2025

Course by Bruno Simon
WebGL, shaders and 3D for the web. My space portfolio is built with what it taught.

Full-stack development courses — Course — 2022

Courses by Jonas Schmedtmann, Udemy
JavaScript and React from the fundamentals up. Course certificates, not an accredited qualification.

Erasmus+ and European Solidarity Corps — International — Dates to confirm

Youth exchanges and volunteering
Youth exchanges and volunteering with people from other countries, in English.

Hackathons — Teamwork — Dates to confirm

Team events
A hard problem, a team and a clock.

Marketing, psychology and UX — Course — Dates to confirm

Short courses
Short courses on how people decide, buy and use products.

SKILLS

Frontend: TypeScript, React, Next.js, Astro, Tailwind CSS

Mobile: React Native, Expo, RevenueCat

Backend and data: Node.js, Supabase, PostgreSQL (RLS), TanStack Query

3D and motion: three.js, React Three Fiber, GLSL, GSAP

AI and quality: Claude Code, MCP, Playwright, Vitest, Lighthouse

i18n: Lingui, lingui-translate-ai

LANGUAGES

Polish: native English: fluent Spanish: basic

INTERESTS

Calisthenics, travel, motorcycles, films, music of every kind, gaming with friends.
